

**Brite White** is the newest technology globally for whitening teeth safely. A cool ray of Blue LED lights, with selected wavelengths using a special custom blend of gel to prevent heat, whiten teeth safely. Be a winner by adding teeth whitening to your repertoire of services. Eleven shades in less than twenty minutes have been achieved on aged teeth.

**Brite White** offers the first LED (Light Emitting Diode) system that is inserted inside of the mouth for ultimate, cosmetic teeth whitening. With Brite White there is no heat, no sensitivity, no cheek retractors, no rubber dams, no saliva drip, no gagging, no long waiting, and no pain. The Blue LED light has been proven to be safe, and using less time promotes whitening without softening enamel, which causes corrosive problems and the disruption of soft and hard tissues. Brite White also prevents damage to the pulp.

**Brite White** treats all teeth. Results for whitening teeth are obtained by attacking the discolorations of the teeth. A specifically tailored gel, a specific wavelength, and power are combined to boost the delivery of the light and to all teeth. The upper and lower inside and outside cover all areas to whiten teeth simultaneously. Brite White uses Carbamide Peroxide and our products do not contain Flouride or alcohol ingredients maintaining the safest products to offer our clients.

**Brite White** is FDA Cleared, US made, Global Patent Pending.

- **Brite White** is the first professional inside-the-mouth chair side teeth whitening available to the spas and salons using LED light emitting diode.
- **Brite White** provides a specific blue wavelength to activate the custom blend Carbamide Peroxide gel.

This oxidizing agent along with a desensitizing solution whitens the teeth and will not cause the enamel to break down as many gels. Hydrogen Peroxide has a short shelf life, Carbamide Peroxide has a longer shelf life.

1 Year warranty on all equipment  
Extended warranties available  
Nationwide servicing  
Training provided

Tetracycline teeth are hard to whiten... Improvement can be expected with Brite White.

## BRITE WHITE MEDICAL SYSTEM

Utilizing Red and Blue LED for the DENTAL Industry  
This powerful light source whitens teeth, kills black bacteria that causes periodontal disease and boost healing – all in ONE machine.....

## What Brite White Customer's Say...

- "I had a 5 minute treatment with another professional treatment [brand] and could not continue. With Brite White, I continued my treatment without sensitivity with exciting results." Angela, Dallas, TX
- "It was great. My teeth feel new." Taniki, Dallas, TX
- "Regarding Ionic White, the procedure is horrendous, and I saw absolutely no results! Plus the fact that you have to do it 3 times is quite a hassle. The worst part about it really was the fact that after the lights turn off after 2 minutes, you have to keep whatever is in your mouth for five minutes. That is kind of disgusting if you think about it. There is nothing like Brite White." Phil, Miami, FL
- "My teeth look great- really white!" Kathy, Garden Ridge, TX
- "It is so great! I really like the results. Thank you." Keb, Dallas, TX
- "Incredible results- my teeth were all but orange, one treatment whitened my teeth 11 shades. I love my smile!" Alwana, Dallas, TX
- "I am very happy with the results. I didn't experience any discomfort whatever. This machine is amazing. Thank you." Jacqueline, Laredo, TX
- "Years of smoking were wiped away in minutes!" Shayne, Stephenville, TX

## The Cutting Edge For Teeth Whitening
